SPECIFIC DATES BUILD/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Ocean Drive district has a character that contrasts sharply with the great houses on Bellevue Avenue--there are rolling green hills, rocky cliffs, pastures and houses ranging from Eidlitz's Swiss Chalet of 1854, to McKim, Mead and White and including the early 18th century farms as well. The rocky shoreline is dotted with summer homes designed in a wide range of architectural styles. The magnificent landscaping was in part the work of Frederick Law Olmsted and as a result the roads and structures respect fully the natural terrain. These houses are much more private than the insular Bellevue Avenue and represent a different age and spirit.

The Harrison Avenue-Beacon Hill area contains the early farms on Brenton land (Hammersmith Farm) and mid 19th century houses, neo classic structures by McKim, Mead and White (Beacon Rock), French chateaux by Cram, Goodhue and Ferguson and Tudor English on a grand scale (Bonniecrest) by John Russell Pope.

Fort Adams falls within the district as well.
The Ocean Drive

Ocean Avenue, or "the Ocean Drive" as it is also called, is a roadway and an area, really, which bounds the city of Newport from its southeastern to its southwestern extremities. This avenue extends circuitously for a distance of about four miles, beginning easterly at the south end of Bellevue Avenue and terminating westerly where it turns a corner and runs into Ridge Road, which leads back past Fort Adams towards the city. Winding Ocean Avenue is bordered on its left (south) side by several short stretches of beaches, a few grassy mounds and some promontories or jetty-like rock formations, but mostly there by ocean inlets and cliffs. On its right (north) side it looks, with some variety, upon lowland fresh-water ponds, swamps and fields and high slopes with trees and shrubs. On either side of this way, and erected over the past one hundred years, are also a somewhat sparsely spaced (and sometimes intentionally hidden) procession of sizeable summer residences displaying a variety of architectural and landscape styles.

The area leads off to Price's Neck and on to Brenton Point and Castle Hill where Ocean Avenue ends and Ridge Road begins. Most prominent is Shamrock Cliff overlooking Jamestown Island and Newport Harbor.

Harrison Avenue--Beacon Hill

An area of about 800 acres in the southwestern part of Newport, close to the ocean (and contiguous to the Ocean Avenue-Ridge Road Historic District) upon the south and near to Newport Harbour and the passage in to it, on the west. It is a section varied in topography and ground cover: it is in portions gently rolling and grassed; in others it displays flat fields and wooded copses; while Beacon Hill is a rocky eminence with trees and greenery clinging to its peak and slopes. Harrison Avenue runs around the District in a northeasterly course, and from it Halidon Avenue extends north practically into the harbour. Hazard Road is a boundary at the southeast, while Brenton Road and Moorland Road wind around the base of Beacon Hill, and Beacon Hill Road and Hammersmith Road wind about the hill, higher up.

The District has always been-and still remains--chiefly in either residential or recreational use. This part of Newport is much more rural and bucolic with rolling green land and farms with larger estates further on.

The properties are described and keyed to the map attached:

Harrison Avenue--Beacon Hill

An area of about 800 acres in the southwestern part of Newport, close to the ocean (and contiguous to the Ocean Avenue-Ridge Road Historic District) upon the south and near to Newport Harbour and the passage in to it, on the west. It is a section varied in topography and ground cover: it is in portions gently rolling and grassed; in others it displays flat fields and wooded copses; while Beacon Hill is a rocky eminence with trees and greenery clinging to its peak and slopes. Harrison Avenue runs around the District in a northeasterly course, and from it Halidon Avenue extends north practically into the harbour. Hazard Road is a boundary at the southeast, while Brenton Road and Moorland Road wind around the base of Beacon Hill, and Beacon Hill Road and Hammersmith Road wind about the hill, higher up.

The District has always been—and still remains—chiefly in either residential or recreational use. This part of Newport is much more rural and bucolic with rolling green land and farms with larger estates further on.

The properties are described and keyed to the map attached:

The Ocean Drive district has a character that contrasts sharply with the great houses on Bellevue Avenue—there are rolling green hills, rocky cliffs, pastures and houses ranging from Eidlitz's Swiss Chalet of 1854, to McKim, Mead and White and including the early 18th century farms as well. The rocky shoreline is dotted with summer homes designed in a wide range of architectural styles. The magnificent landscaping was in part the work of Frederick Law Olmsted and as a result the roads and structures respect fully the natural terrain. These houses are much more private than the insular Bellevue Avenue and represent a different age and spirit.

The Harrison Avenue-Beacon Hill area contains the early farms on Brenton land (Hammersmith Farm) and mid 19th century houses, neo classic structures by McKim, Mead and White (Beacon Rock), French chateaux by Cram, Goodhue and Ferguson and Tudor English on a grand scale (Bonniecrest) by John Russell Pope.

Fort Adams falls within the district as well.
The District boundary starts at the intersection of Bellevue Avenue and Bailey's Beach proceeding east on Bellevue Avenue to Coggeshall Avenue; thence north on Coggeshall Avenue to Ocean Avenue; thence west on Ocean Avenue to the west boundary of Plat 38 lot 46 and proceeding north on this boundary to Almy Pond. The District bound continues north on the east shore of Almy Pond to the south boundary of Plat 37 lot 50; thence west on this boundary to the east boundary of Plat 37 lot 6, thence north on this boundary and west on the north boundary of this lot to the east boundary of Plat 37 lot 92. The District continues south on this boundary and west on the south boundary of this lot and those of lots 90, 89, and 88 to the east boundary of Plat 40 lot 468. It then continues north on this boundary to Ruggles Avenue; thence west on Ruggles Avenue to Carroll Avenue, continuing south on Carroll Avenue to the south boundary of Plat 41 lot 193; thence west on this boundary and those of lots 287, 286, and 284; thence north on the west boundaries of lots 284, 279, 283, and 285 to Ruggles Avenue. The District bound continues west on Ruggles Avenue and continues west on Wickham Road to the south boundary of Plat 41 lot 14½, thence east on this boundary and that of lot 246. The District continues north on the east boundary of lot 246 and lot 14½ to the southern boundary of lot 338; thence east on this boundary and north on the east boundary of this lot to Harrison Avenue. The District bound continues west on Harrison Avenue to Halidon Avenue, thence proceeds north on Halidon Avenue to the north boundary of Plat 42 lot 14. The District bound continues east on the north boundaries of Plat 42 lots 14, 19, 15, and 20 to Chastellux Avenue; continuing south on Chastellux Avenue to the south boundary of Plat 42 lot 28; thence east on this boundary and north on the east boundary of this lot to the south boundary of Plat 42 lot 37. It continues east on this boundary and north on the east boundaries of lots 37, 38, and 39 to Wellington Avenue. The District continues east on Wellington Avenue to the east boundary of Plat 39 lot 9, and proceeds north on this boundary to the Shoreline of Newport Harbor. The District then follows the shoreline in a generally westerly direction to the north boundary of Plat 43 lot 22 and continues west on this boundary and on the north boundaries of lots 8 and 35½ to the shoreline of Narragansett Bay, continuing south east along the shoreline of Narragansett Bay and the Atlantic Ocean to the intersection of Bailey's Beach and Bellevue Avenue.

Physically unique in its natural and developmental composition, the Ocean Drive Historic District represents one of the most significant examples of a summer resort in the United States. A diverse body of generally large and elaborate houses spanning almost a century of design are included in the area. Many of them are the work of nationally prominent architects, including Richard Morris Hunt; McKim, Mead, and White; Peabody and Stearns; William Ralph Emerson; Cram Goodhue, and Ferguson; Warren and Wetmore; Ogden Codman; Grosvenor Atterbury; John Russell Pope; and Irving Gill. Buildings by three locally important designers, George C. Mason, Dudley Newton, and Alexander McGregor, are also present. A substantial portion of these structures are distinguished, sometimes important examples of their respective periods.

Much of the total ambience of the place is the result of work by the Olmsteds (Frederick Law, John C., and Frederick Law, Jr.) who, over a period of some forty years, made a series of significant contributions to the area in the form of two subdivision plats, and a wide variety of landscape designs for various estates. No single effort is either pioneering or unique. But collectively, these works and others less meritorious in their own right, form an assemblage of the first order.

The District is no less significant in American social history. Newport has long held the stature of being among the foremost summer resorts in the western world. Many of the people who built, occupied or visited the houses on the Neck have had an important role in the country's business and cultural affairs. If Bellevue Avenue was the heart line of Newport's summer colony, the Ocean Drive District provided most of the essential outdoor recreation facilities: beaches, golf and polo grounds, as well as the roads themselves--drives being an integral part of the colony's activities. Predating these functions, the Neck supported farms belonging to several leading figures in Newport's colonial history from the time of the city's inception to the Revolutionary War.

At present, the District continues to serve summer residents, and is a prime attraction for visitors who tour Newport in large numbers. While the sizable areas of land that comprise many of the estates help ensure occupant privacy, most segments of the District are readily perceivable from public roadways. This balance is rare. The majority of suburban and summer retreats where buildings of a comparable order can still be found are organized around long, privately-owned drives, or are composed of properties so extensive that little
of their character can be discerned by outsiders. The Ocean Drive District, then, is a particularly instructive example of the opulent existence enjoyed by a relatively small fraction of the population at the time it was developed, and an even smaller one today.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Ocean Drive Historic District includes most of Newport Neck, a prominent geographic protrusion of Aquidneck Island extending to the southwest of the center of the city of Newport. It is bounded by contiguous bodies of water on three sides: Newport Harbor to the north, the mouth of Narragansett Bay on the west, and the Atlantic Ocean on the south. The area has a rolling terrain, much of it rocky, offering panoramic views of land and water in all directions. A wide variety of natural features provide a richly contrasting sequence of environments. Adjacent to the low-lying, craggy coastline are tranquil ponds and marshes, once inlets. Pastureland runs nearby properties elaborately groomed in the 19th century romantic manner. Large summer houses sit amid rugged, sometimes barren, landscapes of rocks and scrub growth. Over the past century and a quarter, the District has hosted a major segment of Newport's wealthy summer colony. The developments that have occurred during this period—partially intentional, partially not—give the area a complex character, blending the opulent with the natural, which is not easily matched in other American coastal resort communities.

Large country places have been located in the District from the 17th century. Much of this land was first owned by William Brenton, one of Newport's founders and a key figure in the colony's early history. Taking possession in 1638, Brenton developed the northern portion of the Neck as farmland, calling it "Hammersmith" after his former home in England. Subsequently, he erected an imposing brick manor house on the property which he used during the summer months. Brenton's son and grandson, both named Jahleel, substantially increased the amount of cultivated acreage, and expanded the family's holdings to include virtually the entire Neck through the purchase of "Rocky Farm" on the southeast side (extending roughly from Almy Pond to Goose Neck Cove). Pastureland comprised a large portion of the Brenton farm, but several sections also boasted of fine orchards with many of the cuttings imported from England. Both the main house and the extensive grounds made it one of the showplaces of the region. Offering some of the most picturesque and varied natural advantages on the Island, the farm also became a popular spot for nearby residents to take walks, picnic, and fish. The Brentons apparently welcomed such activities; Jahleel (II) created pathways and sitting areas around the Lily Pond expressly for these purposes. Prior to the Revolution, several other wealthy Newporters purchased or leased land from the Brentons for use as summer retreats. They included the distinguished architect Peter Harrison, who occupied a large farmhouse on Halidon Hill overlooking the Harbor; and John Collins, later a Rhode Island Governor and United States Congressman, who had a farm just to the east of Castle Hill (#s 14, 33).

The War years greatly altered the District's stature; its pastoral elegance, like Newport's urban opulence, was laid to waste by the British. Much of the cultivated land was plundered, and the abundant groves of trees cut for firewood. Brenton's great house was burned. However, a few remnants of the 18th century survive, most notably a tenant house near Brenton's own, and a similarly used dwelling that formed the nerve center of "Rocky Farm" (#s 20, 53).
But if the Revolution destroyed much of the District's character, it also ensured, by ending Newport's prominence as a mercantile center, the absence of pressure for more intense development. Over the next hundred years, the area continued to be used primarily for farming, albeit on a much less ambitious scale. Remaining in the hands of a few families, the land's natural features experienced few alterations.

The District began to change its function into that of a summer resort at more or less the same time as the eastern section of Newport around what would become Bellevue Avenue. In 1837, Seth Bateman opened a hotel on the site of the Collins farm. The spot grew to be popular not only for extended visits, but for afternoon drives. The emerging summer colony found the rocky shoreline and rolling countryside no less appealing for excursions than had residents of the city in previous decades. Castle Hill, the Lily Pond, and Spouting Rock (named after occasional shots of water caused by an unusual rock formation) became necessary stops on the leisurely sightseeing itinerary taken by many of these people with remarkable regularity. Fort Adams, just to the north of the Brenton House, was the scene of afternoon band concerts where carriages drove slowly in circles around the bandstand as if at a latter-day drive-in. Several beaches were no less popular, one by Bateman's, another next to Spouting Rock (Bailey's Beach) which became one of the social centers for the summer residents (#57).

As early as 1851, the idea of making the entire Neck readily accessible by means of a circumferential drive was voiced by George C. Mason, a local architect and Editor of the Newport Mercury. Behind Mason's proposal, of course, was the desire to capitalize on the rapidly increasing demand for summer cottages. Most of the ensuing development occurred around the newly-created Bellevue Avenue. However, some comparable building activity was experienced in the Neck. The major figure behind it was a wealthy Newport merchant, Edward King, who purchased large tracts of land fronting both the harbor and Narragansett Bay. Following a profitable practice of the time, King erected several villas (and converted at least two old farmhouses, including Harrison's) which he rented (and later sold) to summer residents (#8, 11, 13, 14, 17). Mason designed one of these houses, and may well have been responsible for the others. Mostly concentrated on Halidon Hill, they were comparable in size and in style to many then being built in the Bellevue Avenue area. Similar too, was the layout of the subdivision, with rectangular lots along more or less straight roads (constructed by King); and the nature of the landscaping, with the houses centered on broad lawns amid a variety of imported shade trees and shrubbery. Although some of the earliest houses in this section have been demolished, a substantial number are intact (also #s 2-6, 10).
Probably in anticipation of continued development, King replaced the existing, privately-owned farm road leading to Bateman's with a new, somewhat more direct drive which he deeded to the City in 1857 (Harrison Ave.). Other landholders got into the act. Bateman and Robert Kennedy platted the fields just south of the former's hotel in 1863 (included Castle Hill, Commonwealth, Winan, Atlantic, and Prices Neck and the western end of Ocean Avenues). At about the same time, John Hazard, who now owned "Rocky Farm", opened Carroll Avenue so as to induce the sale of lots on the promontory near Spouting Rock. After frequent agitation by Mason and others, the road around the Neck was finally completed in 1867 with the construction of Ocean Avenue between Bailey's Beach and Bateman's subdivision. But the response to these inducements fell far short of expectations. Over the next twenty years, less than a dozen villas were built throughout the area (excluding Halidon Hill) (#s 34, 36, 56, 60). The quasi-urban character that Bellevue Avenue was assuming, bespoke of a taste for conspicuous ostentation rather than comfortable seclusion. While the Neck, and especially the so-called Ocean Drive, grew steadily in popularity for excursions, many apparently considered it too remote for residential use.

Not until the 1880's, after virtually all the land around Bellevue Avenue had been accounted for, did any substantial new development in the Neck area begin. Unlike previous efforts, these were of an informal character that would help assure retention of the District's identity. The first step in this direction was taken by Edward King's widow and son (George Gordon King) who, together with two other land holders, opened a very sizable tract between Harrison and Ocean Avenues for subdivision in 1885. Laid out by the venerated landscape architects, Frederick Law and John Olmsted, the property was developed with winding roads (Brenton, Hammersmith, Moorland, and Beacon Hill), and was platted with irregularly shaped lots so as to take maximum advantage of the sloping, rocky terrain. Importantly, the ensuing purchases of property were mostly large ones, many times the size of the tight lots indicated in the plan. Furthermore, most of the houses erected on the subdivision over the next decade were designed to blend with the existing landscape, using local stone, and composed in an informal, picturesque manner (#38, 74, 76, 77, 78).

Concurrent events extended this naturalistic developmental approach on both sides of the King properties. In 1888, "Rocky Farm", contiguous to the east, was platted by the Olmsteds in a similar manner (Hazard, Wickham, Jeffrey Roads, and the west extension of Ruggles Avenue). On the west side, a generous plot was acquired in the early 1890's by the Newport Country Club for use as a golf course and polo grounds (#24). In addition, major sections of land fronting Narragansett Bay were bought by John Auchincloss and Gaun Hutton for their own use. Both men erected houses that were among the largest
in Newport at the time, but which (unlike their Bellevue Avenue counterparts) continued the theme of rusticity (#21, 29). The Auchincloss place occupies what had been the heart of William Brenton's farm; and, significantly, the name "Hammersmith" was retained. So, to a limited extent, was its agricultural function. The perpetuation of this tradition, established an important precedent that would be continued in the 20th century with the creation of several other "farms" in the District, which form a major contribution to the area's ambience (#19, 25, 75). Auchincloss, Hutton, and several others further assured a sense of continuity through procuring the Olmsted's services for their properties.

After the turn of the century, little deviation from what had become a prevailing pattern occurred. Building activity was gradual; and no new subdivisions made. Indeed, much of the land in those areas already platted remained undeveloped. Among the relatively few new houses constructed, many were smaller and even more unobtrusive than their immediate predecessors (#39, 41, 69, 80-83). Halidon Hill was an exception. Beginning in the 1890's several imposing residences more in keeping with current trends in the Bellevue Avenue area, were built on the harbor's edge (#9, 15, 17). However, their grounds were much more extensive, and the buildings themselves less pretentiously sited, thus eliminating any references to an urban residential environment. A few additional houses of this order can be found in other portions of the District, offering a rich and somewhat unexpected contrast to their neighbors (#25, 54, 67). In general, however, the degree of formal ostentatiousness present along Bellevue Avenue was avoided. A final wave of development took place during the 1920's and 1930's, representing the majority of summer residences built in Newport at the time. Concentrated on the two Olmsted subdivisions, they generally serve to reinforce the predominating rustic atmosphere. By most standards, even the more modest of these dwellings in the District are large, and possess a rich diet of historical illusions that defies inconspicuousness. Nevertheless, the variety and the extent of open space, combined with a generally sympathetic approach to design, provides a remarkable complimentarity of elements, natural and man-made.

The District experienced little physical change between 1940 and the mid-1950's. Since then, several houses have been demolished (#13, 25, 36, 68); and a number of others converted into institutions, apartments, or hotels (#6, 8, 11, 14, 15, 29, 34, 42, 54, 68, 69, 70, 73, 79). However, few of these alterations have had a significantly damaging impact on the area's overall quality. Even where the houses are now gone, their grounds have generally been maintained; and one has been redesigned as a state park. The apartment conversions have, for the most part, avoided exterior modifications; and the presence of the Castle Hill and Shamrock Cliff Hotels contribute to the life and economic viability of the area. Less fortunate has been the recent loss of open space...
for year round dwellings, some of them erected individually, others as parts of small subdivisions. By themselves, these buildings are not offensive, but neither are they inspired; and their scale and design are generally very much out of context with their surroundings. A few recent buildings have been carefully designed to respond to their environment, and contribute to the visual diversity of the region (#12, 52, 59). Hopefully, they may serve as models for any future construction.

SELECTED INVENTORY

1. King Park, 1897-1902, on land donated to the city by the heirs of Edward King, one of the major developers of the District. Important recreational area and bathing beach for residents of southern section of city. Monument to commemorate the landing of General Rochambeau's army in 1780 erected by the Newport Historical Society in 1928.

2. "Halidon Hill," ca. 1850's, designed by noted local stonemason, Alexander McGregor, for himself; later purchased by Dr. Isaac Hartshorn of Providence. 1 1/2 story stone house; handsome example of Gothic Revival villa with sympathetic late 19th century additions in rear.

3. "Eyry," ca. late 1870s for Mrs. Isaac Hartshorn. 1 1/2 story clapboard house. Good example of "Swiss" cottage found in American seaside resorts of the period; rare survivor of type. Unusually large porch on three sides.

4. "Sonnenchien," ca. late 1870s for Mrs. Isaac Hartshorn. 2 1/2 story clapboard house with distinctive modified bargeboards on gable end. Representative of standard mid-19th century house type without distinct stylistic references.

Chastellux Avenue

5.

7. "Chastellux," 1890-1891 for Lorrilard Spencer of New York. 2 1/2 story stone and shingle house. Distinguished example of Shingle Style somewhat similar to H. H. Richardson's Channing house (1882) in Brookline, Massachusetts. Located on site of Fort Chastellux, a Revolutionary War battery, erected in 1781. (Spencer was the founder of American Illustrated Magazine and fellow of the
American Academy of Design.

8. House, ca. 1850s for Edward King of Newport, as speculative investment, later purchased by Robert H. McCurdy of New York. 2 1/2 story Italianate house with handsome detailing. A good representative of many of the early Newport summer villas. Now apartments.

Halidon Avenue

9. "Harbor Court," 1904 for John Nicholas Brown of Providence; Cram, Goodhue, and Ferguson, architects. 2 story stucco house patterned after 17th and 18th century French Manor houses. A notable example of residential work by the firm.

11. "Lawnfield" (Friedheim), late 18th or early 19th cent., 2 1/2 story 5 bay clapboard house. Owned by Edward King in 1860; subsequently purchased by John R. Ford of New York. Extensive alterations and additions over second half of 19th century include unusually large 3 story tower and elaborate porte-cochere. Now apartments.

Harrison Avenue

13. "Pen Craig Cottage" ("Quail Tree House"), ca. 1860s, 2 1/2 story Italianate house with clapboard siding; similar to others in area built on speculation by Edward King. By 1870, house was owned by George F. Jones (father of Edith Wharton) of New York and used as ancillary dwelling to "Pen Craig" (now demolished) across the street.

15. "Bonnicrest," 1912 for Stuart Duncan of New York; John Russell Pope, architect; additions ca. 1920s probably by Pope; Olmsted Brothers, landscape architects. 2 1/2 story stone and brick house, patterned after Compton Wyngates. An important and influential work in the trend toward a more archaeological approach to the post-medieval English country house that would characterize a large portion of American domestic architecture in the next decade.

16. Outbuildings for "Bonnicrest," built at approximately the same time and probably designed by Pope. Group of five stucco buildings vaguely alluding to English farm complexes. All structures now used as residences, one of them has been extensively altered.

17. "Beachbound," 1895 for William F. Burden of New York; Peabody and Stearns, architects. 2 1/2 story stone and shingle house with stone corner tower; late example of the Shingle Style with 15th century English details. Olmsted Brothers, landscape architects. Grounds include handsome Shingle Style stables.

18. "Beacon Rocke," 1889-1891 for Edwin D. Morgan, Jr., of New York; McKim, Mead and White, architects. 2 story stone house. A highly imaginative interpretation of an ancient Roman villa, with open-ended "atrium" (Georgian in detail), and fieldstone version of the Temple of Vesta at Tivoli as a side porch. Important work of the architects. Grounds include handsome bridge and Colonial Revival stables.

20. Brenton House, ca. 1720s; 1 1/2 story, 5 bay clapboard house with gambrel roof, extensive 18th century additions on both sides, including two rear ells, side walls, brick; Built as tenant farmers house, by Jahleel Brenton II, near site of William Brenton's 17th century manor house.

21. "Hammersmith Farm," 1888-1889, for John W. Auchincloss of New York; R. H. Robertson, architect; F. L. and J. C. Olmsted, landscape architects. 2 1/2 story stone and shingle house; late example of Shingle style; mid-20th century additions to rear. Grounds include several handsome outbuildings and large area of open space.

22. House, before 1844; owned by Edward King in 1860 and retained by the family through the 19th century. 2 1/2 story farmhouse, originally probably with 5 bays of clapboard sheathing; various alterations, are probably after 1860.
23. "Ker Arvor," 1930-1931 for Colonel Snowden A. Fahnstock of Washington, D.C.; Clinton and Russell, architects. 2 story stucco house modelled after 18th century French country houses with details somewhat simplified as was typical for the decade. Unusually formal house for area; but softened by unobtrusive landscaping.

24. Newport Country Club, 1894; Whitney Warren, architect. 2 story stucco and shingle building of highly interpretive design incorporating elements of 16th century Italian and 18th century English architecture, vigorously articulated in the Beaux Arts manner. The design was selected from a competition; the organization is the oldest golf club in the state.

Ridge Road

25. "Annandale Farm," 1900-1901 for Charles F. Hoffman of New York; Hoppin and Koen, architects; Olmsted Brothers, landscape architects. The house was demolished in the late 1960s; the stables and grounds remain intact, although neglected. Handsome brick wall fronting road; landscaping provides formal contrast to adjacent grounds of Hammersmith Farm; a notable open space.

26. House, ca. late 1880s, for Seth Low as part of "Sunset Ridge" (now demolished), 2 story shingle house; modest example of Shingle Style typical of lower middle class suburban communities. Probably built as superintendent's residence.

27. "Broadlawn," 1866 for Edward King as speculative investment; George C. Mason and Son, architects; purchased 1881 by Josiah Low of New York. 2 1/2 story clapboard house with Italianate details and mansard roof; minor late 19th century additions. The earliest surviving summer house in this section of the District.

28. "Ballygrangey House," ca. 1928 for Reginald Hutton of Baltimore. 2 1/2 story shingle house; loosely derived from English post medieval cottages with details fashioned after a wide variety of 18th century American examples.

29. "Shamrock Cliff," 1894-1896 for Gaun M. Hutton of Baltimore; Peabody and Stearns, architects; Olmsted Brothers, landscape architects. 2 story house with towers; reputedly patterned after a villa on the Caspian Sea, but with Romanesque Revival details. Grounds include notable stable (abandoned) and gate lodge. Altered in 1950s for use as a hotel.
30. United States Coast Guard, Castle Hill Station, 1940. 2 1/2 story brick building with cupola, patterned after mid-18th century Virginia house type exemplified by Westover and Carters Grove. Built to replace earlier station destroyed in 1938 hurricane.

Ella Terrace

31. House, ca. 1880s, built as Castle Hill Lightkeeper's lodge. 1 1/2 story brick and shingle building with corner turret; handsome example of Shingle Style in the manner of McKim, Mead, and White.

Commonwealth Avenue

32 "Royden," ca. 1928 for Mrs. Stuyvesant LeRoy of New York. 2 story brick house derived from sources similar to those of the Coast Guard Station. House and grounds unusually formal for this area of the District, more characteristic of Bellevue Avenue area.

33. Collins family burial ground; on site of farm used by John Collins, a wealthy Newport Merchant, governor of Rhode Island 1786-1790 and later a United States congressman.

Ocean Avenue

35. Castle Hill Light House, 1889-1890. 3 story stone structure, a major navigational landmark for vessels entering Narragansett Bay.

38. "Indian Spring" ("Wrentham House"), 1891 for John R. Dusk of New York; Richard Morris Hunt, architect. 2 story stone house with towers; a distinguished personal variation of the Romanesque Revival; an unusual and notable work of the architect.
39. "Wildacre," 1901 for Albert Olmsted of New York; Irving Gill, architect; Olmsted Brothers, landscape architects, 2 1/2 story stone and shingle house, loosely patterned after the English Cottage vernacular. A notable expression of materials, reflecting the rustic quality of the adjacent development designed by the owner's uncle. A notable early work of the architect and one of the few examples of his work outside California.

40. "Playhouse," 1901 originally designed by Gill as the stable for "Wildacre," altered into residence for Thomas Bennett in 1926. 1 1/2 story stone and shingle building.

41. "Bay House," 1917 for Jerome C. Borden of Fall River, Massachusetts; Angell and Swift, architects. 2 and 2 1/2 story shingle house with Colonial Revival details. A notable example of unpretentious post-Shingle Style summer houses found in eastern seaside communities.

42. "Seafair," 1933 for Verner Z. Reed, Jr. of Newport; William MacKenzie, architect. 1 1/2 and 2 1/2 story stone house derived from French chateaux of the 16th and early 17th centuries, and with curving Baroque wings enframing forecourt. Last of the large summer houses to be built in Newport. Now apartments.

43. "Normandie," 1914 for Mrs. Lucy Wortham James of New York; Delano and Aldrich, architects. 1 1/2 story brick house with large forecourt and gate lodge patterned after late medieval Norman farm complexes. Early and notable work of the architects.

44. "Eagle's Nest," 1922-1924 for F. Frazier Jelke of New York; William Aldrich and Henry Sleeper, architects; Olmsted Brothers, landscape architects. 2 1/2 story shingle house combining features of Norman rural vernacular and 18th century New England farmhouses.

45. "Gooseberry Island Lodge," ca. late 1890s, 1 and 1/2 story stone building, originally probably built as part of fishing club on Gooseberry Island, now residence.

46. "Little Clifton Berley," 1930 for Duncan Cameron of Washington, D.C.; Charles Barton Keen, architect. 1 1/2 story brick house with twin towers; a fanciful interpretation of the Norman rural vernacular.

47. "Beach House"("Nearsea"), 1936-37 for Yoakum Fosdick; Ballantyne and Olson, architects. 1 1/2 story concrete block house patterned after French manorhouses of the 18th century.
